

ISCC PLUS BIOMATERIALS CERTIFICATION

Prove the circularity of your materials

BUSINESS CHALLENGE

To improve their circularity and limit environmental impact, companies are turning towards non-fossil based materials. As alternative materials containing recycled content become increasingly available, organizations must carefully monitor their supply chains for quality, reliability and sustainability. In the new economy recycled content in products and their packaging will be vital to proving their improved sustainability over competitive offerings. Governments worldwide are setting ambitious targets for recycling and use of non-virgin materials, and offering tax incentives to companies that meet or exceed sustainability goals.

WHAT IS ISCC PLUS?

With ISCC PLUS, the established ISCC scheme (International Sustainability & Carbon Certification) has been extended to cover food, feed and technical and chemical applications. It can be used all over the world to certify, for example, sustainable use of biomass and/or recyclates from packaging waste in the chemical industry and also in downstream industrial sectors (e.g. the packaging industry). ISCC PLUS also considers sustainability at all stages of the supply and production chains in the food and feed industries.

WHY SHOULD MY ORGANIZATION CERTIFY TO ISCC PLUS?

Voluntary certification to ISCC PLUS provides recognition for recycled and bio-based materials that may be waste from other production processes but can now be used as feedstocks for polymers and biocomposite materials which can be used in a range of applications from packaging to textiles. ISCC PLUS certification provides traceability along the value chain and verifies that companies meet critical environmental and social standards in this emerging area.

ISCC PLUS BIOMATERIALS CERTIFICATION

ISCC PLUS BENEFITS

Demonstrate sustainable business practices via verification of your biomaterials value chain

Prove your commitment to the circular economy to consumers, suppliers and other stakeholders

Get robust proof of traceability from a sustainable source

Reduce your company's environmental impact

Demonstrate to your customers that your products conform with internationally recognized sustainability criteria

Demonstrate sustainability across industries with your certification

HOW CAN I GET CERTIFIED TO ISCC PLUS?

WHY CHOOSE BUREAU VERITAS?

Combined accreditation and audit

Bureau Veritas Certification is accredited to carry out ISCC PLUS audits, as well as ISCC for biofuels. We can therefore offer you combined audits in order to satisfy all of your needs with a single audit.

Knowledge of the agricultural upstream

We have auditors who regularly work in the agricultural upstream, with cereal cooperatives and agricultural trading companies.

Experience in sustainability

Bureau Veritas Certification is one of the leaders in social responsibility certification and the verification of greenhouse gas emissions. In the forest-wood and agri-food sectors, we are recognized for auditing multi-dimensional sustainability issues.

Network

With 150,000 active ISO certificates and 7,000+ skilled auditors, Bureau Veritas is present in 140 countries with local specialists in 80 countries.
